Sanitary Sewer Repair Project Nears Final Completion on 2800 block of East Virginia Beach Blvd in Broad Creek Neighborhood Final Paving and Restoration Scheduled for November-December 2014

Dear Valued Customer,

The City of Norfolk Department of Utilities is pleased to inform you that new sanitary sewer pipes have been installed in the area shown on the map to the right and the City's contractor, Inner-View, will soon begin pavement restoration.

The resurfacing is scheduled for late November and the project will take several weeks.

The City and our contractor will do our best to minimize the unavoidable disruptions associated with the repaving. During the repaving, the City will maintain two-way traffic and sidewalks will be open. Some on-street parking may be temporarily affected.

If you have any questions regarding this project, please do not hesitate to contact the City's on-site construction inspector, Alex Swafford. He can be reached by cell phone at 621-4086 to respond quickly. You may also contact the project manager, Christopher Krus, at 664-6752.

The Department of Utilities appreciates your patience as we work to provide you with improved neighborhood infrastructure.

Sincerely,

Kristen M. Lentz, P.E.
Director of Utilities
